

Official External / Ayenati Laboratory Statistics Report

Primary health-care centre referrals received by the laboratory

REPORTING PERIOD

2026-08-16 to
2026-08-27

DOC REF

EXT-LAB-STAT-20260828

VERSION

1.0

CONFIDENTIAL - prepared for hospital administration and health-authority review. Contains aggregated laboratory workload statistics only; no individual patient data is included. Please handle in line with your organisation's information-governance policy.

Executive Indicators

TESTS RECEIVED  28,431	SAMPLES RECEIVED  8,837	UNIQUE PATIENTS  3,210
UNIQUE ORDERS  3,435	DIFFERENT TEST TYPES  56	VERIFIED (L1+L2)  90.5%

Scope and Method

This report covers laboratory tests referred from outside the hospital through the Ayenati programme (primary health-care centres) and received by the hospital laboratory during the reporting period. Records are filtered to **Is external lab order = Yes** and to specimens marked received by the laboratory. The counting unit is one analytical **test**, grouped by a cleaned **Test description**; tests, samples, patients and orders are reported as separate measurements. Source export: **External LAB AYANATI 16-27-aug-2026.xlsx**. No patient-identifiable data is included in this document.

Received Workload vs. Excluded Records

Specimen state	Records	% of external
Received by laboratory (counted)	28,431	73.5%
Pending / not yet received (excluded)	8,574	22.2%
Received by receptionist only (excluded)	1,465	3.8%
Rejected (excluded)	197	0.5%
Total external records	38,667	100.0%

Daily Workload

Date	Tests	Samples	Patients	Orders
2026-08-16	3,028	928	333	350

Date	Tests	Samples	Patients	Orders
2026-08-17	2,328	786	276	292
2026-08-18	3,503	1,127	418	450
2026-08-19	2,536	848	306	316
2026-08-20	2,193	651	254	259
2026-08-21	21	5	3	3
2026-08-22	435	109	39	41
2026-08-23	2,948	906	353	365
2026-08-24	3,499	1,067	365	376
2026-08-25	3,970	1,198	429	471
2026-08-26	2,657	809	306	319
2026-08-27	1,313	403	187	193
TOTAL	28,431	8,837	3,210	3,435

Average tests per day: 2,369.20 | Highest-volume day: 2026-08-25 | Lowest-volume day: 2026-08-21 | Maximum daily test count: 3,970 | Minimum daily test count: 21 | Number of days covered: 12

Data Quality and Validation

Check	Value
Total raw rows in file	38,667
Header row detected at (0-indexed)	4
Rows identified as external (Is external lab order = Yes)	38,667
Rows excluded as internal / non-external	0
Exact duplicate exported records removed	0
External rows after de-duplication	38,667
Rows received (Samplestatus = Received / Received = 1)	28,431
Rows received by receptionist only (not counted as lab-received)	1,465
Rows rejected (excluded)	197
Rows pending / not yet received (excluded)	8,574
FINAL: valid external Ayenati tests received	28,431
Blank Test descriptions (in received set)	0
Blank Sample barcodes (in received set)	0
Blank MRNs (in received set)	0
Blank Order no (in received set)	0

Check	Value
Distinct raw Test description spellings	59
Distinct cleaned/normalised Test Names (received)	56
Missing expected columns	none

Validation: the sum of test counts across all test names equals the total tests received (28,431); percentages sum to 99.99%; 0 duplicate export record(s) were detected and removed; raw rows in file: 38,667.

- `Divisionname` is entirely blank in this export - no division breakdown is possible.
- No internal/non-external rows were present.
- No duplicate records found.
- 1,465 'received by receptionist only' rows excluded from the strict received count (a broader definition including them would give 29,896).
- Reconciliation: $28,431 + 8,574 + 1,465 + 197 = 38,667$ external rows.
